AMPHOS, technology leader in high average power ultrafast laser systems has announced that it has launched a Korean version of their website. It is available at [www.amphos.co.kr](http://www.amphos.co.kr).

The new website improves the communication to potential and already established Korean customers. AMPHOS aims to provide the best service possible to the fast growing community of companies who are using AMPHOS Lasersystems in their production. With the local sales partner, EUROVISION LASER, AMPHOS can provide a direct and local contact for their customers. EUROVISION LASER is well familiar with AMPHOS products

AMPHOS products are the most powerful (400W and more) ultrafast lasers and amplifiers. Applications range from scientific research up to industrial applications in micromachining.
